Recording setup for instructors

01 / Understand the task

Microphones, lighting and the settings that make a difference.

Make a short teaching recording that is intelligible, readable and easy to follow.

Choose one small, real example to work on. A focused attempt gives you better evidence than a general impression.

Your example: _____

Your audience: _____

Your intended outcome: _____

One constraint: _____

Recording setup for instructors

02 / Put a method to work

1. Choose a quiet room and record a ten-second voice test.

2. Place the microphone consistently; reduce room noise before adding processing.

3. Use soft light facing you, not a bright window behind you.

4. Enlarge demonstration text and hide unrelated notifications.

5. Record one clear explanation, one example and one small learner task.

6. Review the exported sound and image; supply captions or a transcript.

Working notes: _____

_____

Recording setup for instructors

03 / A worked practice scenario

Test sentence: "Today we will make one small change, check it, then explain why it helped."

Listen for clipping, hum, echo and changes in level. Watch whether the cursor and demonstration text are easy to follow.

The theme room controls are simulations. Use your real recording software and device settings for an actual microphone test.

Apply the method to your own example. What changes?

Your first attempt: _____

Your revision: _____

Recording setup for instructors

04 / Reflect and keep going

Can a learner understand the lesson without perfect hearing, a large screen or prior tool knowledge?

What is clearer after using this workbook?

_____

What evidence supports that conclusion?

_____

What is the smallest useful next step?

_____

Feedback prompt: "I noticed ____. That helped / made it harder to ____. One thing to try is ____."
