Portfolio review scorecard

01 / Understand the task

The six criteria we use in critique night, with anchors for each score.

Review a portfolio case study using observable evidence rather than personal taste.

Choose one small, real example to work on. A focused attempt gives you better evidence than a general impression.

Your example: _____

Your audience: _____

Your intended outcome: _____

One constraint: _____

Portfolio review scorecard

02 / Put a method to work

1. Problem: is the audience and intended change specific?

2. Process: does the case study show decisions, not just a list of tools?

3. Craft: can you read and navigate the work without guessing?

4. Evidence: are claims supported by examples, research or honest limitations?

5. Reflection: does the learner explain what changed after feedback?

6. Communication: can someone understand the story in two minutes?

Working notes: _____

_____

Portfolio review scorecard

03 / A worked practice scenario

Score each criterion 1-3: 1 = absent or unclear, 2 = present but incomplete, 3 = clear and supported.

Example: "Process = 2. Two drafts are shown, but the reason for choosing the second is missing."

Next step: add one annotated comparison explaining the decision and the constraint it answered.

Apply the method to your own example. What changes?

Your first attempt: _____

Your revision: _____

Portfolio review scorecard

04 / Reflect and keep going

Are your scores attached to concrete evidence and one achievable revision?

What is clearer after using this workbook?

_____

What evidence supports that conclusion?

_____

What is the smallest useful next step?

_____

Feedback prompt: "I noticed ____. That helped / made it harder to ____. One thing to try is ____."
